INTRODUCTION

Kentucky coal production was 165,603,339 tons in 1986. The 1986 production of 165,603,339 tons was 4,012,724 tons less than the previous year of 169,616,063 tons. Kentucky remained the nation's largest coal producing state by outdistancing the nearest rival by 30,199,992 tons. In 1986 over sixty seven million tons of coal were mined by surface operations while over ninety-seven million tons were mined underground.

The coal industry furnished direct employment for 40,956 miners.

Fourteen miners were killed in Kentucky coal mine accidents in 1986.

The clay mining industry mined 343,947 tons in 1986. No fatal accidents occurred at clay mines during the year.

The following chart compares production of the various types of coal mines for the past two years:

	PRODUCTION IN TONS			
TYPE MINE	1986	1985		PER CENT CHANGE
Rail-Auger Strip	2,520,221	2,573,120	–	2.06

DIRECTORY AND STATISTICS OF DEPARTMENT OF MINES AND MINERALS INSPECTION DISTRICTS

To facilitate the mine inspection duties of the Department, the coal fields have been divided into six inspection districts. A mine rescue station which serves as the district office is centrally located in each district. The Eastern Kentucky coal field is divided into five districts, with mine rescue stations located at Harlan, Hazard, London, Martin and Pikeville. An office at Madisonville serves the Western Kentucky coal field.

The operations for the district offices is directed from the office of the Commissioner located in Lexington. General staff and Lexington office personnel are as follows:

Willard Stanley, Commissioner
Margaret Caywood, Principal Assistant
Curtis Miller, Chief Examiner
Faith Miller Cole, Executive Staff Advisor[1]
Nancy Toombs, Executive Secretary
Jon Wertzler, Director of Administrative Services[2]
Eugene D. Attkisson, Attorney Chief
Sallie Hubbard, Legal Secretary
Randy Donahue, Director of Administrative Services[3]
Betty Bostick, Accountant
Connie Wolfe, Sr. Accountant
Joey Lucas, Administrative Specialist
Susan Burke, Fiscal Officer
Karen Shillito, Accountant
Eula Witt, Office Supervisor
Tammy Compton, Chief Clerk[4]
Julane Mullins, Chief Clerk
Georgia Staab, Chief Clerk
Delbert Robison, Printing Equipment Operator
Larry Koster, Principal Clerk (part-time)[5]
Johnny Howard, Messenger (part-time)
Geoffrey Belcher, Clerk (part-time)[6]

The Directory and Statistics of Coal Mines contained in the following pages is separated by Inspection Districts and by Counties.

Code letters to classify mines are as follows:

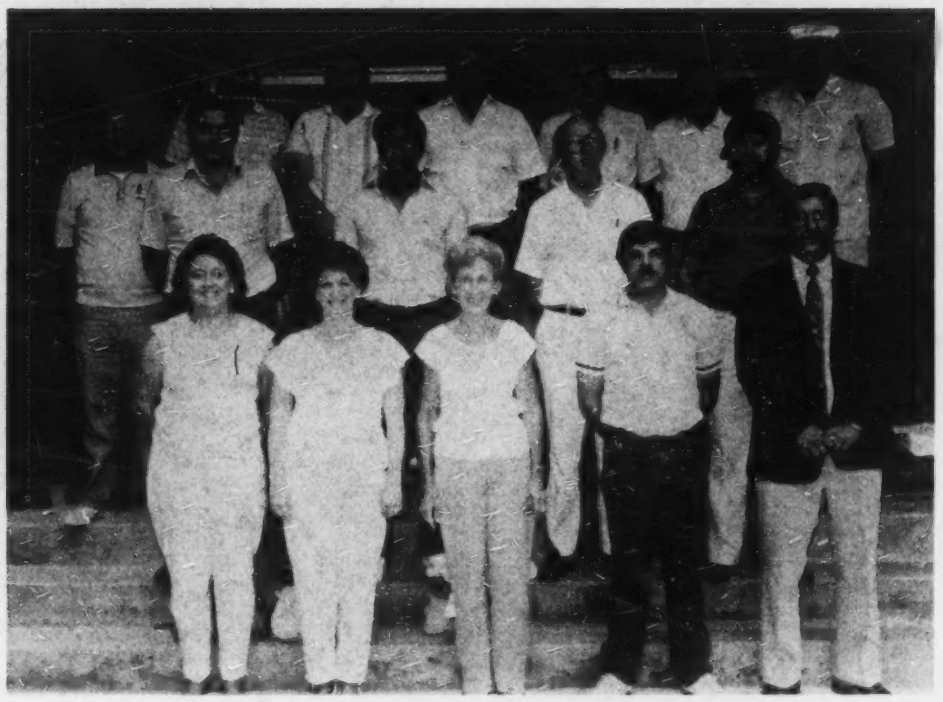
URC	Underground Rail Coal
URWC	Underground Rail Water Coal
UTC	Underground Truck Coal
UWC	Underground Water Coal
ARC	Auger Rail Coal
ASRC	Auger Strip Rail Coal
ASTC	Auger Strip Truck Coal
ATC	Auger Truck Coal
SRC	Strip Rail Coal
STC	Strip Truck Coal
SWC	Strip Water Coal
SRCL	Strip Rail Clay
STCL	Strip Truck Clay
GSTC	Gob Strip Truck Coal

Notations made are as follows:

A	Abandoned
CC	Change of Company Name only
CO	Change of Operator and Company Name or Operator Name only
*	Estimated Tonnage

Production, employment and accident figures for River mines have been included in the totals for Truck mines for the purpose of compiling statistical charts.

Many of the coal production figures of individual mines which appear herein have been estimated by the Department. This was necessary because the reports of the operators of those mines, particularly mines which became abandoned during 1986, were delinquent at the time of publication.



MINES AND MINERALS HARLAN DISTRICT
PERSONNEL—1986

HARLAN DISTRICT

The office and mine rescue station of the Harlan District is located in the old Margie Grand Theater Building, corner of Central and Second Streets, Harlan, Kentucky. The Harlan District is comprised of Bell and Harlan Counties.

EMPLOYMENT

The total number of men employed in the 21 commercial clay mines in Kentucky during 1986 was 96. This was a decrease of 8 employees compared to the total of 104 in 1985.

ACCIDENTS

No fatal accidents occurred in 1986. The last previous fatal was on May 20, 1968 in which a surface equipment operator lost his life.

MINE FIRES AND IGNITIONS IN KENTUCKY

JANUARY 9, 1986, MINE NO. 1 STILLHOUSE COAL COMPANY, INC., CAWOOD, HARLAN COUNTY. While backing a roof bolting machine out of the right room neck off No. 5 entry, the operator apparently backed over the trailing cable. The cable caught under the left rear wheel of the bolting machine which pulled the cable, causing it to short out, setting the tire on fire and burning a hole in the hydraulic oil tank. The DC cable fuses in the nip did not blow; therefore, the power remained on the cable until it burned in two. State and federal officials along with company personnel extinguished the fire with rock dust. There were no personal injuries.

JANUARY 9, 1986, MINE NO. 1, BURKE ELKHORN MINING CORP., RACCOON, PIKE COUNTY. An 11-RU Joy cutting machine caught fire due to a grounded cable. The fire was extinguished by sealing the area. There were no personal injuries.

MARCH 11, 1986, MINE NO. 4, BIG HILL COAL COMPANY, HATFIELD, PIKE COUNTY. An apparent ignition of methane occurred at the beginning of the pillar section in or around spad No. 3177. One employee received second degree burns on his face, hands and arms. Three other employees sustained minor injuries.

JUNE 23, 1986, STILLHOUSE MINE, ACTION ENERGIES, INC., PIKEVILLE, PIKE COUNTY. A Long-Airdox LRD-15A roof bolting machine caught fire due to a grounded cable. The fire could not be extinguished and the mine was sealed three crosscuts inby the portal. Two days later tests showed the fire was no longer burning. Seals were removed and the machine was moved to the outside. There were no personal injuries.

AUGUST 9, 1986, PYRO NO. 9 SLOPE, WILLIAM STATION MINE, PYRO MINING COMPANY, INC., STURGIS, UNION COUNTY. A shot firer was tamping up the right side crosscut in the No. 1 entry when the 2nd hole he was putting powder in "holed through" without his knowledge. The two sticks of powder he had pushed into the hole fell through into the loose coal where he had just shot the left side crosscut in the No. 2 entry. He went into the No. 2 entry where a loader operator was loading coal and told him what happened. He then returned to the crosscut to retrieve the cap out of the powder that had fallen into the loose coal. He then put a water dummy in the hole that had gone through the two more sticks of powder, then another water dummy behind the charge. At this time he called the loader operator out of the No. 2 entry and set the blast off. Apparently when

the shot went off all of the sticks of powder went off, causing a dust ignition. Heat from the ignition burned the loader operator on his hands, arms, shoulders, back and face. The mine foreman, who was on the section at the time, was burned over 89% of his body. The mine foreman died on August 16, 1986.

OCTOBER 6, 1986, RADFORD MINE NO. 1, SIDNEY COAL COMPANY, INC., SIDNEY, PIKE COUNTY. Apparently a roof fall behind a sealed area in a non-producing mine caused a methane explosion. There was no equipment or personnel involved.

NOVEMBER 5, 1986, PYRO NO. 9, WILLIAM STATION MINE, PYRO MINING COMPANY, INC., STURGIS, UNION COUNTY. A belt transformer shorted-out and caught loose coal on fire inside the belt transformer box in the No. 4 entry, 2nd Main West, No. 54 crosscut. The fire was extinguished by company personnel. There were no personal injuries.

DECEMBER 17, 1986, MINE NO. 1, THE FIVE OF US COAL COMPANY, INC., FEDS CREEK, PIKE COUNTY. A 482 S & S scoop caught fire in or around the panel board and pump motor. The fire suppression system on the scoop was activated. The fire was extinguished with the use of fire extinguishers and rock dust. There were no personal injuries.

TRAINING AND EDUCATION

A full time Training and Education Program was established in 1971, with a Federal Grant from the Mine Enforcement and Safety Administration, now known as the Mine, Safety, and Health Administration (MSHA). This is a very effective program and is staffed with eight (8) well qualified mining instructors and five (5) electrical instructors, who are stationed in the six district offices and mine rescue stations.

The following list shows the type of certificates issued and the number of men/women involved in the different safety courses conducted by this Division in 1986. (This includes both organized classroom work and field work).

MINER TRAINING, EDUCATION AND CERTIFICATION DIVISION

The Board of Miner Training, Education and Certification as provided by Chapter 351, Paragraph 105, Kentucky Revised Statutes, was composed of the following members in 1986.

Willard Stanley		Chairman
William Joe Morgan	Mine Member	Eastern Kentucky[1]
Troy Ed Chafin	Mine Member	Eastern Kentucky[2]
Raymond Ashby	Operator Member	Western Kentucky
James Childers	Operator Member	Eastern Kentucky
Lewis Chaney	Mine Member	Western Kentucky
William E. Clayton, Director, Miner Training, Education and Certification Division		Non-Voting Member

Pursuant to KRS, 351.106 Underground Miner Training and Certification Regulations were implemented in October 1977. During 1978 the required 48-hour inexperienced miner's program was prepared and the first classes were taught in May 1978. Through December 31, 1986, 38,966 persons were issued Temporary Inexperienced Miner's Work Permits; of this number, 3,127 were issued during 1986.

After the Underground Miner Training and Certification Regulations were implemented in October 1977, the Board of Miner Training, Education and Certification established a date of November 1, 1978, as the date all persons employed in underground mines should meet this requirement. As of December 31, 1986, 32,612 persons have been issued underground miners certificates. Of this total, 381 are female miners. July 1, 1986, 14,163 certified miners' were purged from the system, leaving a total of 32,612 in the system.

Uniform two-day examinations for Mine Foremen and Inspectors were scheduled by the Board to meet the demand whenever it arose. Examinations were held in the Department offices in Lexington and at various localities throughout the coal fields, whenever the number of applicants made it justifiable. Mr. Curtis Miller now serves as Chief Examiner throughout the Commonwealth.

Examinations were multiple choice in character. Applicants were given written examinations on the following subjects: Mine Law; First Aid; Ventilation; Apparatus and Electricity; Fires and Explosives; General Mining Practices and Gases. Each applicant was tested on his/her ability to detect methane with a flame safety lamp, and use of an anemometer in the calculation of the rate of air current flow. The miner was further required to prove his/her knowledge of safe mining practices in an interview with the Examiner, and to indicate safe and practical methods of ventilation on a typical mine map.

A list of those who successfully completed the required examination for foremen and inspectors is shown on the following pages:

CARL ANKROM, DIRECTOR
MINE SAFETY ANALYSIS DIVISION

MINE SAFETY ANALYSIS DIVISION

The Mine Safety Analysis Division consists of one Director, one Assistant Director and thirty-seven field personnel. The primary responsibility of the safety analyst is to prevent underground mine accidents and fatalities by observing and evaluating the work habits of persons involved in the direct production of coal and to contact, advise, and assist these persons on a one-to-one basis correcting their unsafe or potentially hazardous actions. In 1986 they completed 312,469 personal contacts and observations.

The program has served the industry well as evidenced by the decrease of underground fatalities since its inception. The analyst's primary concern is underground on the working section where the majority of mining accidents occur. This area proved to be a much safer working environment in 1986. Thirteen (13) fatalities were reported underground in 1986 down from 16 in 1985 and 29 in 1984.

We remain very optimistic about greater safety accomplishments for the industry in 1987, which will mark the Division's 10th full year of service to the mining industry.

The future goals of the Mine Safety Analysis program, as are the goals of the Kentucky Department of Mines and Minerals, are to further reduce all mining accidents by promoting and maintaining safety standards in the state's coal mines thus preserving the Kentucky mining industry's most valuable resource, *THE MINER.*

PERSONNEL—1986

EXPLOSIVES AND BLASTING DIVISION

During 1986, 413 new General Blaster's Licenses were issued, and 3,399 General Licenses were renewed. Also, 41 new Limited Licenses were issued and 246 Limited Licenses were renewed. There were 734 General Examinations given, 73 Limited Examinations given, and 1,494 Blasters Certification Exams given. To obtain a General or Limited Blaster's License, the applicant must pass the prescribed written examination and must have two years of practical blasting experience. Thirty-one 30-Hr. courses were offered at various locations around the state and were attended by 776 people. There were thirty-five 4-Hr. courses taught at various locations and were attended by 305 people.

The Division of Explosives and Blasting continued its program of inspection, enforcement, education, and licensing of blasters in 1986. A total of 454 new blaster's licenses were issued during the calendar year 1986. Of these 454 new licenses, 413 were general blaster's licenses, and 41 were limited blaster's licenses. As of December 31, 1986, there were 4,099 individuals holding current and valid Kentucky blaster's licenses. Of these 3,812 were general licenses, and 287 were limited licenses.

During 1986, well over 800 million pounds of explosives were detonated in Kentucky. This quantity represents 20% of the total explosives used in the entire United States.

The division conducted thirty-one blaster's training courses throughout the Commonwealth in 1986. These classes were attended by 776 people, who were primarily applicants for blaster's licenses. The locations and number of attendees in these courses were as follows:

These courses consist of thirty hours of instruction covering all aspects of explosives use. The purpose of the course is to raise the competency level of the blasters in the field as well as assist those preparing to take the blaster's examination. The public is better protected and the blaster's work environment is safer when the blaster's ability is enhanced through training.

The Explosives and Blasting inspectors answer 100% of all public complaints received by this division. These complaints primarily concern ground vibrations, noise, flyrock, and various other adverse effects of blasting. The inspector's investigation of the complaints involves inspection of the operation generating the complaint and extensive seismic monitoring. During 1986, the division made 252 such investigations of public complaints and used the seismograph 166 times in order to resolve these complaints.

In addition, the inspectors continue to make routine checks of all blasting operations to ensure compliance with the laws and regulations governing the use of explosives. The division inspects not only those companies using explosives, but also companies engaged in the manufacture, sale, storage, and transportation of explosives. Thirty-seven companies engaged in the sale or distribution of explosives in the Commonwealth registered with the division in 1986.

During the year the division has participated in a number of seminars sponsored by other state agencies and educational institutions. It has been the aim to use every opportunity for education of the public and training of blasters in the safe use and associated hazards of explosives.

During 1985, the Department signed a Memorandum of Agreement with the Cabinet for Natural Resources and Environmental Protection whereby the Division of Explosives and Blasting would provide the training and testing of blasters employed on surface coal mines as mandated by the Federal Office of Surface Mining. OSM approved the lesson plans and examinations submitted by the Division on December 10, 1985. We were given a one year deadline to train and test all such blasters. Additionally, the Division has been recognized by the National Society of Explosives Engineers as having a model state program. Numerous other states have since contacted us for assistance in developing their training and testing programs for blasters.

The Division of Explosives and Blasting has conducted thirty-five 4-Hr. training courses for surface coal mine blasters throughout the Commonwealth in 1986. These classes were attended by 305 people who were primarily applicants for the blasters certification program and 1,494 took the certification examination. OIL AND GAS DIVISION

LEGISLATION

The Division submitted three (3) significant pieces of proposed legislation for introduction into the 1986 Legislative Session. SB-22, relating to Pooling of oil and gas interest, and SB-48, relating to deep well unit operation both failed to be adopted into law.

SB-299 relating to the UIC program was adopted as a new section of KRS 353.

PERMITTING

The four (4) counties receiving the most permits in 1986, in descending order are as follows: Cumberland, Warren, Clay and Barren. These counties accounted for 36% of the permits issued and are the same counties that contributed only 9% of the total oil production of the year.

DIVISION PROCEDURES

In an effort to streamline the permit issuance and record management procedures, the Division of Oil and Gas has converted to a computerized system. We are currently on-line with the Kentucky Geological Survey using the VAX/VMS Operating System (VAX/750) for our data processing needs.

We are developing a well history that can be utilized daily. At present, there are approximately 45,000 wells stored on-line for which we have data relative to the permit, operator, well location, pertinent dates and well completion. On a trial basis, one field inspector can access our system through a remote terminal. He can obtain information instantly concerning the status of wells, filing of records, etc. In addition, he can inform our Division Personnel immediately of reports and other information pertinent to drilling activity throughout the state.

At the close of 1986, the Oil and Gas Division had 10 field inspectors, 2 field supervisors and 11 employees on its administrative staff.

Available to the public is a weekly publication of permits issued identifying the permit number, operator name, farm name, county, carter coordinates, and target formation. This publication may be obtained by an annual subscription of eighteen (18) dollars. We are, however, unable to furnish back issues of the publication.
